Our Approach

We identify problems, measure and evaluate risks and offer solutions.

We understand many industries are trying to reduce their emission of pollutants, we provide them cost effective solutions.

We provide them suggestions to maximize productivity and efficiency in capital forced environment.

We look into employee health safety to identify risks which can prone to hazards compliance with new or existing rules and regulations for corporate standards.

Introduction

Next-Gen Environment Science Laboratory (NESL) is a NABL accredited state-of-the-art facility based in Silvassa (DNH). With over 14 years of experience, we provide analysis & testing services to all industries along with consultancy services for CPCB, PCC, GPCB, CGWA & MoEFCC. Our highly trained and experienced staff have expertise in monitoring for contamination in both natural and built environments. Our analysis covers a wide variety of complex matrices such as air, water and waste water.

We strive to be recognized as the most reliable and customer-focused testing service provider and we are trusted partner of choice for quality, safety, security and sustainability solutions.

Environmental Monitoring, Testing & Consultancy Services

Testing Services

(CPCB / GPCB / PCC Compliance)

- **Ambient Air Monitoring:** Assess and monitor air quality to safeguard health and meet regulatory requirements.
- **Waste Water:** Evaluate the quality of wastewater to meet environmental standards and promote sustainable practices.
- **Stack / Process Stack Emissions:** Environmental concerns are at an all-time high across the country. NESL has demonstrable experience and knowledge in delivering stack / process stack emissions analysis.

Water & Waste Water Treatment Plants Services

We provide complete end to end Design, Operation & Maintenance Services for :

- **STP** (Sewage Treatment Plants)
- **ETP** (Effluent Treatment Plants)
- **Industrial RO** (Reverse Osmosis Plants)
- **ZLD** (Zero Liquid Discharge Plants)
- **MEE** (Multi Effect Evaporator)
- **RWH** (Rain Water Harvesting)

Consultancy Services

(Complete Solution for all Industries)

- **Environmental Audit:** Helps a company/organization assessing its activities and services in relation to environmental status, compliance to establish an Environmental Management System (EMS).
- **Environmental Management Audit:** Provide feasibility & adequate report of the Environment Management System, which verifies whether the company or organization has met the environment objectives / policies.
- **Environment Clearance (MoEF&CC):** For new projects, project expansion or modernization of existing projects based on their potential on environmental impact from the Ministry of Environment, Forest & Climate Change.
- Techno Legal consultation for GPCB / PCC / CGWA
- New Project / New Factory Compliance
- NABL Accreditation & Audits
Certifications: ISO 17025, 14001, 45001

Suppliers

Large selection of lab waste water reagent and chemicals for a variety of water and waste water testing parameters and high performance boiler water chemicals.
